

CONTENTS

Effect of Dilution on the pH of Soils Treated with Various Cations. ALFRED T. PERKINS AND H. H. KING.....	1
A Method for the Study of Azotobacter and Its Application to Fertility Plot Soils. IRVIN H. CURIE.....	9
The Carbon-Organic Matter Factor in Forest Soil Humus. HERBERT A. LUNT.....	27 ✓
The Effect of Various Sources of Organic Matter on the Properties of Soils as Determined by Physical Measurements and Plant Growth. H. B. SPRAGUE AND J. F. MARRERO.	35
Exchangeable Cations of the Soil and the Plant: I. Relation of Plant to Certain Cations Fully Saturating the Soil Exchange Capacity. K. K. GEDROIZ.....	51
An Improved Soil Sampling Tube. HORACE J. HARPER	65
Book Review.....	71
On the Decomposition of Hemicelluloses by Microorganisms: I. Nature, Occurrence, Preparation, and Decomposition of Hemicelluloses. SELMAN A. WAKSMAN AND ROBERT A. DIEHM.....	73
On the Decomposition of Hemicelluloses by Microorganisms: II. Decomposition of Hemicelluloses by Fungi and Actinomyces. SELMAN A. WAKSMAN AND ROBERT A. DIEHM.....	97
On the Decomposition of Hemicelluloses by Microorganisms: III. Decomposition of Various Hemicelluloses by Aerobic and Anaerobic Bacteria. SELMAN A. WAKSMAN AND ROBERT A. DIEHM.....	119
Studies on the Transformations of Iron in Nature: III. The Effect of CO ₂ on the Equilibrium in Iron Solutions. H. O. HALVORSON.....	141
The Use of Hydrogen Peroxide for Estimating Humification. H. L. RICHARDSON.....	167
The Alcohol Method for Determining Moisture Content of Soils. GEORGE BOUYOUCOS.	173
The Moisture Equivalent as a Measure of the Field Capacity of Soils. F. J. VEIHMEYER AND A. H. HENDRICKSON.....	181
The Effect of Drying and Ultra-Violet Light on Soils. A. E. MORTENSON AND F. L. DULEY.....	195
A Simple Electrodialysis Cell for the Routine Determination of Exchangeable Bases in Soils. M. L. M. SALGADO AND G. W. CHAPMAN.....	199
The Influence of Lime on the Recovery of Total Nitrogen in Field Crops. J. G. LIPMAN, A. W. BLAIR AND A. L. PRINCE.....	217
Double Infection of Leguminous Plants with Good and Poor Strains of Rhizobia. D. H. DUNHAM AND I. L. BALDWIN.....	235
The Fixation of Nitrogen by Leguminous Plants Under Bacteriologically Controlled Conditions. P. W. WILSON, E. W. HOPKINS AND E. B. FRED.....	251
Changes in Composition of Soybeans Toward Maturity as Related to Their Use as Green Manure. WM. A. ALBRECHT AND W. H. ALLISON.....	271
The Effects of Vegetation and Climate Upon Soil Profiles in Northern and Northwestern Wyoming. JAMES THORP.....	283 ✓
Soil Profile Studies: III. The Process of Podzolization. J. S. JOFFE.....	303
Book Reviews.....	325
Field Method for Lime Requirements of Soils. R. H. BRAY AND E. E. DETURK.....	329
The Laws of Soil Colloidal Behavior: VI. Amphoteric Behavior. SANTE MATTSO.....	343
Some Influences of the Development of Higher Plants Upon the Microorganisms in the Soil: IV. Influence of Proximity to Roots on Abundance and Activity of Microorganisms. ROBERT L. STARKEY.....	367

Some Influences of the Development of Higher Plants Upon the Microorganisms in the Soil: V. Effects of Plants Upon Distribution of Nitrates. ROBERT L. STARKEY..	395
Book Reviews.....	405
Relation of pH Drift to Moisture Content and Base Held in Soils. ALFRED T. PERKINS AND H. H. KING.....	409
Further Observations Upon the Nature of Capillary Rise Through Soils. H. A. WADSWORTH.....	417
Effect of Replaceable Sodium on Soil Permeability. A. EVAN HARRIS.....	435
Replaceable Iron and Aluminum in Soils. P. E. TURNER.....	447
The Determination of Lime Requirement by the Direct Addition of Calcium Carbonate. G. P. PERCIVAL.....	459
Effects of Sorghum Plants on Biological Activities in the Soil. ARTHUR D. MCKINLEY..	469
The Longevity of Legume Bacteria on Seed, as Influenced by Plant Sap. NANDOR FORGES.....	481

ILLUSTRATIONS

PLATES

A METHOD FOR THE STUDY OF AZOTOBACTER AND ITS APPLICATION TO FERTILITY SOIL PLOTS

Plate 1. Range of Colony Counts.....	25
--------------------------------------	----

THE EFFECT OF VARIOUS SOURCES OF ORGANIC MATTER ON THE PROPERTIES OF SOILS AS DETERMINED BY PHYSICAL MEASUREMENTS AND PLANT GROWTH

Plate 1. The Effect on Plant Growth of Incorporating Various Types of Organic Matter with the Soil.....	49
Fig. 1. Relative values of the three untreated soils used in the experiment, as indicated by plant growth.....	49
2. The effects on plant growth of adding various sources of organic matter to a sandy soil.....	49
3. The effects on plant growth of adding various sources of organic matter to a clay loam soil.....	49

AN IMPROVED SOIL SAMPLING TUBE

Plate 1. Soil Sampling Tubes and Hammers Used in This Investigation.....	69
--	----

THE ALCOHOL METHOD FOR DETERMINING MOISTURE CONTENT OF SOILS

Plate 1. Soil Dispersing Machine Showing the Spring, Cork Stopper, and Bottle.....	179
--	-----

A SIMPLE ELECTRODIALYSIS CELL FOR THE ROUTINE DETERMINATION OF EXCHANGEABLE BASES IN SOILS

Plate 1. Ten Cells Mounted and Connected in Parallel to the Main Terminals.....	215
---	-----

DOUBLE INFECTION OF LEGUMINOUS PLANTS WITH GOOD AND POOR STRAINS OF RHIZOBIA

Plate 1. Red Clover Plants Just Before Harvest (123 Days Old) Showing the Growth Following Inoculation at Various Times.....	249
--	-----

THE FIXATION OF NITROGEN BY LEGUMINOUS PLANTS UNDER BACTERIOLOGICALLY CONTROLLED CONDITIONS

Plate 1. Fixation of Nitrogen by Clover in Agar Substrate.....	269
Fig. 1. The influence of inoculation on clover in agar substrate.....	269
2. The fixation of nitrogen by effective and ineffective clover strains in agar substrate.....	269

THE EFFECTS OF VEGETATION AND CLIMATE UPON SOIL PROFILES IN NORTHERN AND NORTHWESTERN WYOMING

Plate 1. The Gray-Brown Desert Soils of Big Horn Basin.....	299
Fig. 1. Typical vegetation on gray-brown desert soils of Big Horn Basin....	299
2. Showing how the gray-brown desert soils of Big Horn Basin stand in vertical columns where exposed by erosion.....	299
Plate 2. Acid Prairie and Podzolic Soils in the Big Horn Mountains.....	301
Fig. 1. Showing open grassy lands and alpine fir thickets at 9,000 feet elevation in Big Horn Mountains.....	301
2. Open prairie with strips of lodgepole pine forest at 8,500 feet elevation, Big Horn Mountains.....	301

THE DETERMINATION OF LIME REQUIREMENT BY THE DIRECT ADDITION OF CALCIUM CARBONATE

Plate 1. The Equipment Used to Mix the CaCO_3 with the Soil Suspension.	467
--	-----

TEXT-FIGURES

EFFECT OF DILUTION ON THE pH OF SOILS TREATED WITH VARIOUS CATIONS

Fig. 1. pH Values at Several Soil-Water Ratios.	6
---	---

A METHOD FOR THE STUDY OF AZOTOBACTER AND ITS APPLICATION TO FERTILITY PLOT SOILS

Fig. 1. Relation of Incubation Period to Number of Colonies.	15
2. Relation of Number of Plates to Per Cent Error.	15
3. Relation of Colony Count to Nitrogen Fixation.	17
4. Relation of Logarithm of Colony Count to Nitrogen Fixation.	17
5. Data for Section C on Corrected Check Basis.	20
6. Data for Section D on Corrected Check Basis.	21

AN IMPROVED SOIL SAMPLING TUBE

Fig. 1. Longitudinal Section of Soil Sampling Tube Made from 14-Gauge Seamless Steel Tubing.	66
2. Collar of Soil Sampling Tube Showing Hole in Which Steel Rod is Inserted.	66
3. Cross Section of Ribbed Portion of Soil Sampling Tube.	66

ON THE DECOMPOSITION OF HEMICELLULOSES BY MICROORGANISMS: II. DECOMPOSITION OF HEMICELLULOSES BY FUNGI AND ACTINOMYCES

Fig. 1. The Rate of Decomposition of Mannan in Sand Medium by Pure Cultures of Fungi and Actinomycetes.	111
2. The Rate of Decomposition of Mannan in Salep in Sand Medium by Pure Cultures of Fungi and Actinomycetes.	112
3. The Rate of Decomposition of Xylan in Sand Medium by Pure Cultures of Fungi and Actinomycetes.	113
4. The Total Decomposition of the Various Hemicelluloses by Fungi in a Period of Six Weeks.	114
5. The Rate of Decomposition of the Various Hemicelluloses by Actinomycetes in a Period of Six Weeks.	115

ON THE DECOMPOSITION OF HEMICELLULOSES BY MICROORGANISMS: III. DECOMPOSITION OF VARIOUS HEMICELLULOSES BY AEROBIC AND ANAEROBIC BACTERIA

Fig. 1. Comparison of the Rate of Decomposition of Certain Hemicelluloses by Aerobic Bacteria.	134
2. Extent of Decomposition of Various Hemicelluloses by Aerobic Bacteria.	135

THE MOISTURE EQUIVALENT AS A MEASURE OF THE FIELD CAPACITY OF SOILS

Fig. 1. Field Capacity Plot at Yuba City on Madera and Gridley Loam 4 Days After a Depth of 4 Inches of Water Was Applied.	187
2. Field Capacity Plot at Yuba City on Madera and Gridley Loam, 4 Days After a Depth of 8 Inches of Water Was Applied.	187
3. Field Capacity Plot at Hughson on Fresno Sandy Loam, 6 Days After a Depth of 4 Inches of Water Was Applied.	188
4. Field Capacity Plot at Hughson on Fresno Sandy Loam, 6 Days After a Depth of 6 Inches of Water Was Applied.	188
5. Field Capacity Plot at Riverside on Hanford Fine Sandy Loam 5 Days After a Depth of 3 Inches of Water Was Applied.	189
6. Field Capacity Plot at Riverside on Hanford Fine Sandy Loam 5 Days After a Depth of 6 Inches of Water Was Applied.	189

A SIMPLE ELECTRODIALYSIS CELL FOR THE ROUTINE DETERMINATION OF EXCHANGEABLE BASES IN SOILS

- Fig. 1. a, Diagram of the New Two-Compartment Cell; b, The Anode Used in the Cell..... 202

DOUBLE INFECTION OF LEGUMINOUS PLANTS WITH GOOD AND POOR STRAINS OF RHIZOBIA

- Fig. 1. The Effect of Double Infection with Good and Poor Strains of *Rhizobium leguminosarum* on the Dry Weights and Nitrogen Content of Peas (*Pisum sativum*).... 243
 2. The Effect of Double Infection with Good and Poor Strains of *Rhizobium trifolii* on the Dry Weights and Nitrogen Content of Red Clover (*Trifolium pratense*)..... 244

THE FIXATION OF NITROGEN BY LEGUMINOUS PLANTS UNDER BACTERIOLOGICALLY CONTROLLED CONDITIONS

- Fig. 1. Fixation of Nitrogen in Sterile Agar Cultures (Experiment IV)..... 259
 2. Fixation of Nitrogen in Non-sterile Agar Cultures (Experiment IV)..... 260

CHANGES IN COMPOSITION OF SOYBEANS TOWARD MATURITY AS RELATED TO THEIR USE AS GREEN MANURE

- Fig. 1. Nitrogen Content of Soybeans During the Season as Correlated with Soil Moisture..... 273
 2. Cellulose-Nitrogen Ratio of Soybeans During the Season..... 277
 3. Ratio of Carbon to Nitrogen as Considered "Decomposable" for Soybeans During the Growth Season..... 279
 4. Ratio of Carbon to Nitrogen of Soybeans During the Growth Season..... 279

THE EFFECTS OF VEGETATION AND CLIMATE UPON SOIL PROFILES IN NORTHERN AND NORTHWESTERN WYOMING

- Fig. 1. Average Annual Precipitation..... 284
 2. Average Annual Temperature for Wyoming..... 284
 3. Average Annual Precipitation in Yellowstone National Park..... 285
 4. Map and Cross Section of Northwestern and North Central Wyoming Showing Soil Belts and Their Relation to Altitude..... 287
 5. Relationships of Soils to Forests and Prairies in Yellowstone and in Big Horn Mountains..... 290
 6. Gradation of Soil Profile from Desert to Humid Mountain Top—West Slope of Big Horns..... 290

SOIL PROFILE STUDIES: III. THE PROCESS OF PODZOLIZATION

- Fig. 1. Weakly Podzolized Soil with a Bleached Horizon Below B..... 315
 2. A Podzol with a Bleached Horizon Below B..... 315
 3. A Podzol with a Dark Colored Subhorizon A₁'..... 315
 4. A Diagrammatic Presentation of the Influence of Micro-Relief on the Gradual Replacement of the A₁ Horizon by the A₁' Subhorizon and Finally by the A₀ Horizon (Peat Formation)..... 316

FIELD METHOD FOR LIME REQUIREMENT OF SOILS

- Fig. 1. Relation of pH Values and Degree of Base-Saturation of the Base-Exchange Capacity in 74 Samples of Surface Soil..... 330

RELATION OF pH DRIFT TO MOISTURE CONTENT AND BASE HELD IN SOILS

- Fig. 1. Drift of pH at Various Soil-Water Ratios..... 414
 2. Drift of pH One-Half Minute to One Minute. Soils Treated with Various Bases. Soil-Water Ratio 1-2.5 and 1-1..... 414

FURTHER OBSERVATIONS UPON THE NATURE OF CAPILLARY RISE THROUGH SOILS

Fig. 1. Rise-Time Curve for Glass Tube Over Water.....	418
2. Log.-Rise Log.-Time for Unscreened Testing Sand.....	419
3. Relation Between Constants for Testing Sand and Grain-Sizes Involved.....	421
4. Log.-Time Log.-Rise for Fine Emery, Together with Resulting Moisture Distribution.....	422
5. Log.-Rise Log.-Time Curve for Unwashed Building Sand.....	422
6. Log.-Rise Log.-Time for Yolo Sandy Loam.....	424
7. Log.-Rise Log.-Time Curve for Natural Kunia Soil, Together with Resulting Moisture Distribution.....	424
8. Log.-Rise Log.-Time Curve for Heated Kunia Soil, Together with Resulting Moisture Distribution.....	425
9. Moisture Distribution Curve for Santa Clara Soil.....	428

EFFECT OF REPLACEABLE SODIUM ON SOIL PERMEABILITY

Fig. 1. A and B Typical Time Curves for the Rate of Percolation.....	437
2. Relation Between Transmission Constant and Percentage of Sodium for Two Horizons.....	440
3. A B, Change in Sodium Percentage with the Time and A_1B_1 Shows Increase in the Rate of Percolation with the Time.....	443

REPLACEABLE IRON AND ALUMINUM IN SOILS

Fig. 1. Relationship Between Hydrogen-Ion Concentration and Content of Replaceable Aluminum of Soil.....	451
2. Relationship Between Soil Content of Replaceable Hydrogen and Aluminum... ..	452
3. Relationship Between pH Value of Soil and Thiocyanate Color.....	455
4. Relationship Between Soil Content of Replaceable Hydrogen and Thiocyanate Color.....	456

THE DETERMINATION OF LIME REQUIREMENT BY THE DIRECT ADDITION OF CALCIUM CARBONATE

Fig. 1. The Effect of Aeration on the Titration Curves When CaCO_3 Is Used.....	460
2. Titration Curves of Two Soils that Differ in Organic Matter.....	461
